

BOEING COMPOSITES MALAYSIA

Project Engineer

We seek a highly skilled and motivated Project Engineer to join our project team. The Project Engineer will be responsible for overseeing and managing a range of engineering projects, including Civil, Structural, Architectural (CSA), Mechanical & Electrical (M&E), and Machine Installation, from start to completion. This role demands a combination of technical expertise, project management skills, and excellent communication abilities.

Responsibilities:

- Plan, execute, and oversee engineering projects ensuring they are completed on time, within scope, and budget.
- Coordinate with cross-functional teams, including design, procurement, and construction, to ensure seamless project execution.
- Develop detailed project plans, schedules, and budgets.
- Monitor project expenditures and ensure they remain within budget.
- Identify cost-saving opportunities without compromising quality.
- Prepare and review budget reports, making adjustments as necessary to stay on financial track.
- Provide technical guidance and support to project teams
- Review and approve technical designs, specifications, and documentation
- Conduct feasibility studies, site inspections, and technical assessments
- Prepare and present project status reports, proposals, and technical documentation
- Manage risk assessments and mitigation plans
- Monitor project progress and adjust plans as needed to achieve goals
- Manage subcontractors and vendors, ensuring their work meets project requirements

Requirements:

- Bachelor's degree in Engineering (Civil, Mechanical, Electrical, or related field)
- Minimum [3] years of experience in project engineering or management roles
- Proven track record of successfully managing complex engineering projects
- Proficiency in project management software (e.g., MS Project, AutoCAD)
- Familiarity with relevant industry standards and regulations
- Excellent communication and interpersonal skills
- Strong problem-solving and analytical abilities
